BASIC GAME CONTROLS

LEGACY OF WAR puts you in the battle zone!

The default settings are shown here. You can change these settings in the OPTIONS (Page 6-7) menu if you wish.

The legacy...

1957. A large object lands in the Amazon basin, near the ruins of a lost Mayan city. Scientists dismiss the incident as a trivial cosmic occurrence.

1987. Rumors reach the Pentagon's front office. Frightened villagers in the Amazon River area talk of a hideous being with an army of evil alien henchmen. Two heroic members of the Elite Special Forces (operating under the code names: "Scorpion" and

"Mad Dog") are dispatched. They deal with the threat known as Red Falcon, and put a stop to its attempt to take over the Earth.

1990. Red Falcon resurfaces. He has recruited other alien allies, and also attempts to use biological contaminants to turn U.S. forces into his soldiers of destruction. Scorpion and Mad Dog reunite to deal with Red Falcon and Jagger Froid. Scorpion and Mad Dog kick serious alien butt.

Fast forward to the future. The vile Black Viper is sent to accomplish what Red Falcon could not: overtake planet Earth. Scorpion is sent in to erase Viper. After a brutal confrontation, Viper is defeated.

Years later: The elite Contra Force—an independent law enforcement group made up of Special Forces alumnus—is sent in to handle an Earth-based terrorist group known as D.N.M.E. who are trying to take control of Neo City.

2636. The future is once again threatened by Red Falcon. Fortunately, descendants of Scorpion and Mad Dog are on hand to deal with the situation. The Alien Wars take place, and the Earth is nearly destroyed.

Five years later...mankind is recovering from the Alien Wars. The government establishes the Unified Military Special Mobile Task Force, a.k.a. HARD CORPS, to help stem the rising threat of crime that is running rampant in the cities. Order is restored. Or is it?

The present

Colonel Bassad is the dictator of a small country. Some call him cruel. Some call him ruthless. Most call him an evil lunatic. It has only recently been learned that during the Alien Wars, a security guard at a top-secret military base managed to smuggle out an alien embryo. The guard sold the embryo to Colonel Bassad, who has used it to breed an army of fierce alien mutants. Bassad is power-hungry and wants nothing less than total control of the planet. There are rumors that he is working with an alien ally. Some fear that this alien ally may help Bassad by providing an army of alien mercenaries.

Before the conflict can escalate to such a disastrous level, the Special Forces are pressed into service once again. They must try to put an end to this **legacy of war**.

Getting started

Once you have set up the game (page 2), you will see the opening legal screens, then the introductory story, then the main menu. (On many menu screens you can press the \triangle button for help.)

Main menu

You can select a 1 PLAYER GAME, 2 PLAYER GAME, OPTIONS or LOAD GAME (to load a previously saved game).

Highlight a choice with the ($\uparrow\downarrow$) buttons and press \times .

After you have selected a 1 Player or 2 Player game, you will advance to the Player Select screen.

Options screen

Highlight a choice with the ($\uparrow\downarrow$) buttons.

Adjust the game **difficulty** (EASY, NORMAL or HARD) with the $\leftarrow\rightarrow$ buttons.

Adjust the **Music** and **SFX** (sound effects) volumes with the $\leftarrow\rightarrow$ buttons.

Toggle the **3-D Mode** on or off with the $\leftarrow\rightarrow$ buttons. If you turn the 3-D mode on, you will need to wear the enclosed 3-D glasses.

Press the START button to pause the game. From there you can continue or quit and start over with a new character.

Press \times to enter the **controller configuration** screen. Use the $\leftarrow\rightarrow$ buttons to select one of the four options. (The default setting is shown on page 3.) Press \times to select the configuration you like.

The \bigcirc button returns you to the Options menu.

Adjust the **Sound** for STEREO or MONO with the $\leftarrow\rightarrow$ buttons.

Press the \bigcirc button to return to the Main menu.

Player Select screen

Use the $\leftarrow\rightarrow$ buttons to toggle between the four main characters. The name of the character and the type of weapon power-ups available to that character are listed at the bottom of the screen.

Press the \times button to select your character and start the game.

Press the \bigcirc button to return to the Main menu.

Find the Bamboo Arcade and take some R&R with a few classics. Just don't get too hooked and forget your mission!

Level Three: River of Destruction

Take control of the hovercraft and steer toward the end boss. First you'll have to take out the Garbage. Literally.

Use your radar to find and defeat the bosses and their troops.

Blast away secret walls and find hidden items, like this bomb!

Level Four:

Saving a game

To save a game, you must reach the end of a level and defeat the end boss. You will be given the option of saving your place or continuing. If you want to save your game, follow the on screen prompts. Otherwise, select NO and continue at your own risk.

If you haven't saved a game previously, CONTRA will prompt you to create a saved game file...

Follow the instructions on-screen to enter a file name for your saved game. When you are done, select OK and press the button.

Once you're done, you can return to the action. Games are saved after you finish a level and are about to begin a new one, so when you load a game, it takes you right to the start of the new level.

Note: Do not remove a memory card during a Save or Load.

Loading a saved game

At the Main Menu you have the option to load a saved game. You must have a previously saved game ready, of course (see previous section). Make sure your Memory Card™ (sold separately) is installed properly.

You can save up to 12 games in each difficulty setting for both one and two player games.

MAXIMUM 3-D!

You can play LEGACY OF WAR with the enclosed 3D glasses. Just set the 3D Mode to ON in the Options menu. Here are some tips to help you get the best 3D effects:

- Before putting on your 3D glasses (and after turning 3D Mode ON), adjust the **brightness** setting on your TV until you see two pictures (red and blue). (Consult your TV's Owner's Manual for details.)
- Set the TV's **contrast** about 25-50% higher than normal. (Consult your TV's Owner's Manual for details.)
- While wearing the 3D glasses, adjust the TV's **color** so that you get one image, rather than two (red and blue).
- Play with very little background light in the room so no glare appears on the TV.

Character profiles

Ray

Member of the Unified Military Special Mobile Task Force, a.k.a. HARD CORPS, following the Alien Wars. Ray doesn't like to talk about the past, but the word is that he has taken part in more combat than the government will actually confirm participating in. In addition to being a hand-to-hand combat master, he is a weapon's expert and an ace pilot. Ray enjoys sushi, long walks on the beach, and owns a fabulous collection of show tunes.

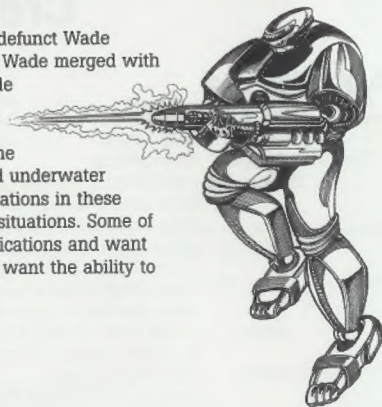

Tasha

Swift, silent, deadly. Before you make the obvious joke, note that Tasha once destroyed a HF-77 Assassin Cybot with one hit for making the same joke. She doesn't have a sense of humor—her style doesn't call for one. She is all business, all the time. A former soldier-for-hire, Tasha joined the organized Special Forces because of the respect she gained for Ray in a previous assault on Kyhsak II. She can kill in many ways, but prefers heavy firepower because, she says, she enjoys the fireworks.

CD-288

An offshoot of the Assassin Cybots made by the defunct Wade Industries before the Alien Wars. After the wars, Wade merged with software giant ChuckSoft and formed Chuck/Wade Arms, Co. Their first venture was the CD (Cyborg Destroyer) series. This particular unit—from the 288 class—was reprogrammed by a member of the HARD CORPS to function in both anti-gravity and underwater environments. Previous Destroyer units had limitations in these conditions, but were totally ruthless in all other situations. Some of the suits at Chuck/Wade are against these modifications and want the unit returned—but skeptics say that they just want the ability to market the unit themselves.

Bubba

We know little about "Bubba". Although there is no denying Bubba's effectiveness, there is no knowledge of his (hers? its?) past. An alien who can communicate in our languages, Bubba has fought on behalf of Terrans since before the Alien Wars. (The nickname came from one of the HARD CORP's base computer geeks when he was scanning the known planetary sites for information about this alien.)
